Yiva Plastik started production in the plastic sector in 2013 as a small workshop in Denizli. Today, it is among the leading companies with its daily production of 15.000 kg in a closed area of 1700 m2. Yiva Plastik, which has become a competent person with years of experience, continues on its way confidently. The company continues to work with the same care and patience in every production.

Yiva Plastik, which has an ambitious position in the sector, continues to work in the plastic sector with various options. Thus, it has become a company that produces fast and ambitious products in a short time by prioritizing customer satisfaction.

Plastic possesses some threats. Plastic can remain in nature for millions of years and causes environmental pollution. While plastic makes people's lives easier, it is also harmful to nature. Therefore, Yiva Plastik is cautious about its business to protect nature and the environment and encounter any negativity. It produces high-quality and biodegradable products.

Yiva Plastik shapes its products according to your requests since it aims to make its customers always happy. Yiva Plastik increases product quality day by day with long years of experience in the packaging industry. The products are Shrink Rolls, Heavy Duty Bag, LDPE-HDPE Film Roll, Perforated Film Roll, Industrial bags, Grocer Roll Bags, Stretch Film, Shopping Carrier bags, Delicatessen Bag, Textile bags, Garbage bags, Printed Bags, Greenhouse Film, Refrigerator Bag, Vegetable and Fruit Bags and Anti-fog, Gelatine, Recycle bags, Safe bags, and Carpet bags. The company has retained a good position within the sector with trust, quality, and cost advantage.

Our Products

Industry Group | Packaging Group | Agriculture Group

Industry Group

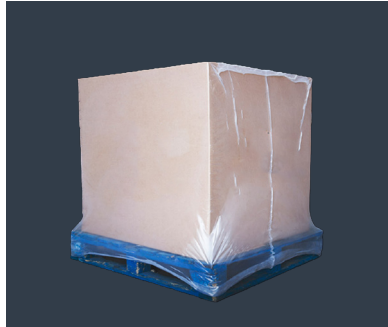

Shrink Film

Shrink film is an industrial product made of Polyethylene raw material and produced in different sizes and thickness according to usage areas. It is used by wide range of industrial areas such as water and liquid packaging, food packaging, white goods, electronic and ceramic materials packaging.

Shrink Hood

Shrink hood film is produced in rolls and bags for wrapping pallets while protecting products against dirt and sun radiation with UV stabilization.

LDPE-HDPE Film Roll

It is a material used for packaging purposes in many areas such as automotive, white goods and furniture in order to protect the products from moisture and dust. It can also be produced as perforated.

It can be produced in various sizes and thicknesses.

Perforated Film Roll

Produced in various sizes and thicknesses based on different usage areas.

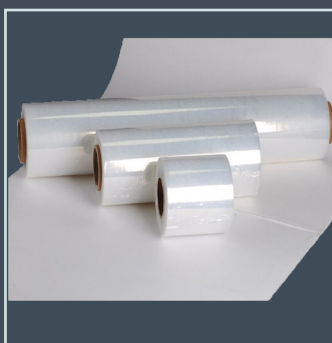

**Bespoke product specifications
can be made to order.**

Stretch Film

It protects products from external factors such as hot, cold, rain, dust and dirt. The product with glossy and slippery exterior surface is anti-dust and dirt-resistant.

It prevents the pallets from sticking together. It is transparent, light and economical, as well as resistant to all weather conditions. It can be used in packaging all kinds of products.

Manual Stretch Film

Produced in Standard 50 cm width
Thickness 15 – 17 – 20 -23 micron Stretched up to 300 %
Packaged in boxes of six
Can be supplied in Jumbo Rolls

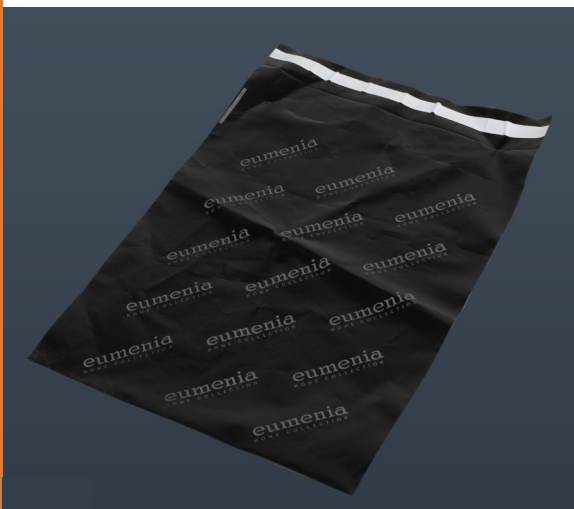

Super Power Stretch Film (Machine Type)

Produced in Standard 50 cm width Thickness 15 – 17 – 23 micron Stretched up to 400 %
Packaged in boxes of one
Have high flexibility and strength

Agriculture Group

Greenhouse

Film With many years of experience in agricultural plastic film production and investments in latest technology 3-layered co-extrusion machinery enable us to manufacture high quality greenhouse films wide up to 6 metres.

Greenhouse films have been developed to meet the requirements of both specific crops as well as the particular climate for the region it is used in.

Additionally, greenhouse films gain extra features with combination of additives which provide excellent agronomic result for growers in terms of better crop yield.

Vegetable and Fruit Bags

Fruit and vegetable bag are used for fruits and vegetables such as cucumber, carrot, tomatoes, aubergine, pomegranates and bananas, to be stored and transported without being influenced by external factors. It can be produced with and without holes on demand.

Anti-Fog Bag

It protects products from external factors such as hot, cold, rain, dust and dirt. The product with glossy and slippery exterior surface is anti-dust and dirt-resistant.

It prevents the palettes from sticking together. It is transparent, light and economical, as well as resistant to all weather conditions. It can be used in packaging all kinds of products
